

The Future is Here!

Latest innovations in LMR, PSMB, Critical Broadband and Control Rooms

A free online bitesize event that brings the latest in critical communications deployments and innovations straight to you

23rd November 2021; 12.00 - 14.30pm AEDT

Event Overview

This free 2-1/2 hour on-line Bitesize event is brought to you by the Australasian Critical Communications Forum (ACCF) chapter of the TCCA.

It will allow you to hear directly from users and technology suppliers on the evolution of standardised mission critical LMR and Broadband and what new technologies will drive change in the ecosystem in Australia and abroad.

The Bitesize sessions are curated to give the latest insights to those on the frontline, as well as procurement and commissioning managers in charge of strategic planning.

This event is free for all to attend.

Programme Topics

- Australian Public Safety mobile broadband update
- Global technology developments driving change in critical communications
- Delivering Australia's critical networks now and in the future
- Global trends in control room solution
- Status of 3GPP/ETSI & TIA/ANSI (US) developments
- Overview of the global technology evolution and standardisation in mission critical communications
